

# Restaurant in Prescott

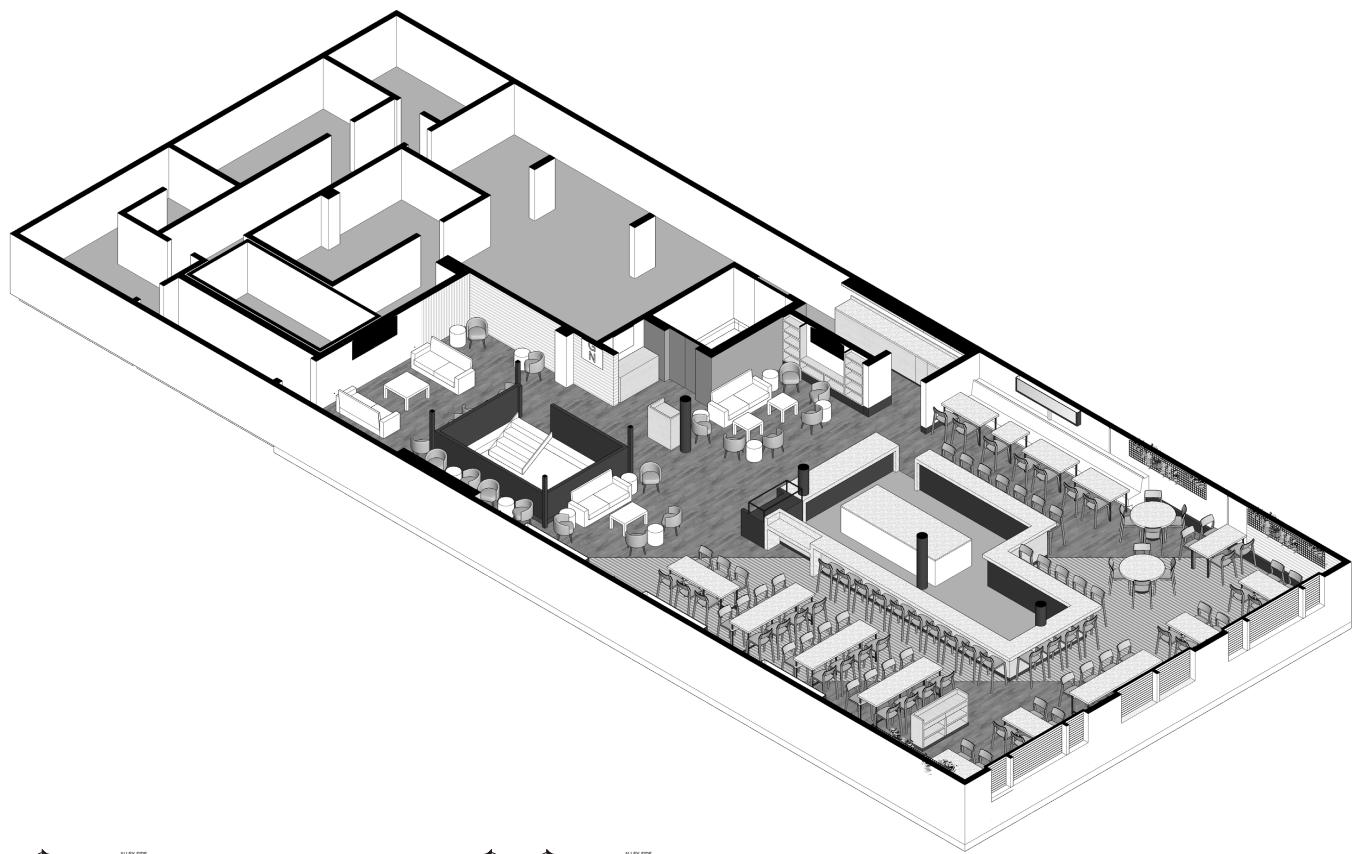

Summer 2019 / Prescott, AZ, USA / Anthony Mrkic Architect, Inc.

[Work completed as part of a team]

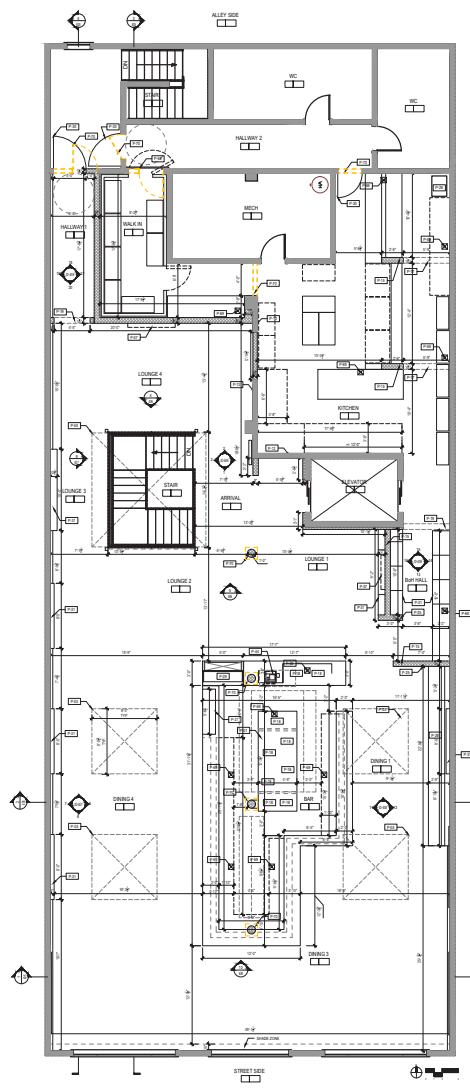

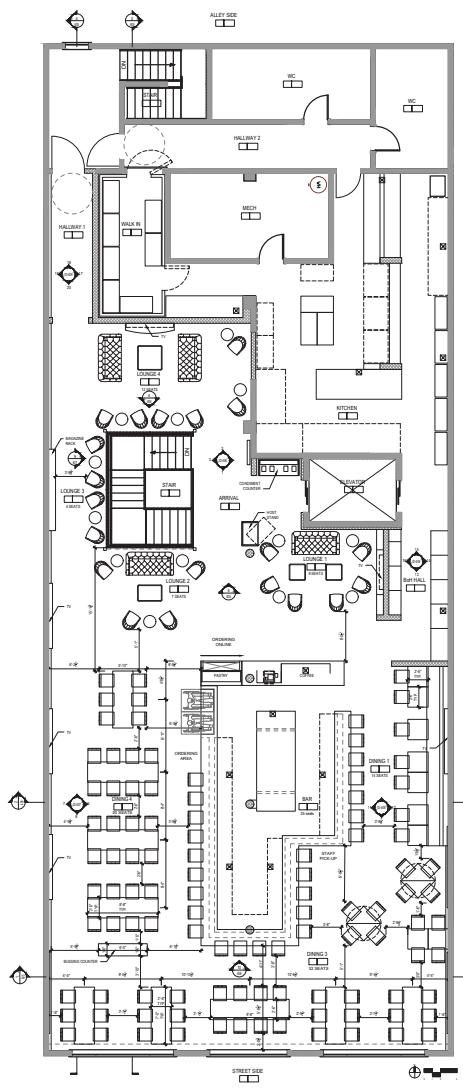

Currently under construction, this project is a renovation of the second floor of a historic downtown building into a restaurant and bar with an inviting, green atmosphere. I was primarily responsible for visualizations which had to be completed quickly to communicate design ideas and changes to the client. I also contributed to drawing permitting documents and selecting finishes and furniture.
