

Library Archives: Looking Up

Spring 2018 / New Orleans, LA, USA / Prof. Seth Welty

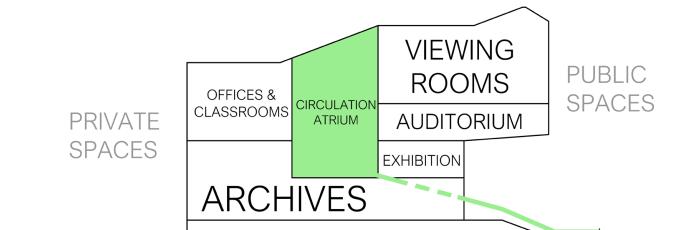

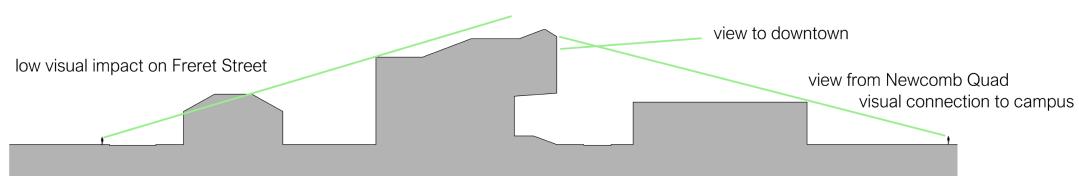

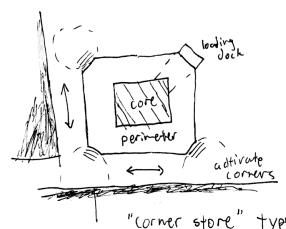

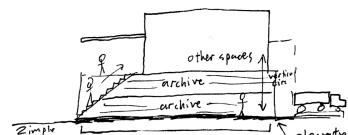

Surrounding buildings are all oriented away from the site.

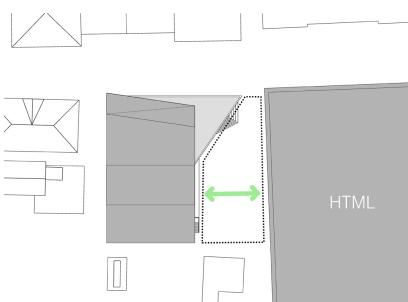

The site is situated at the interface between the city and campus axes.

There are multiple directions of access to the site for both drivers and pedestrians.

The entry sequence bypasses the archives to the 2nd floor lobby.

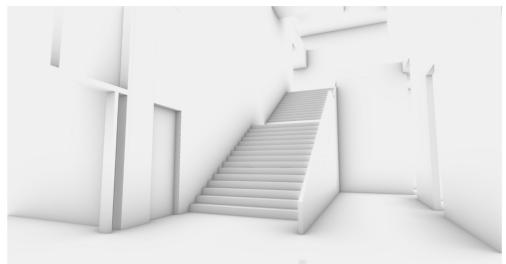

The overall massing is set back from HTML, which increases light access to both buildings while creating an enclosed outdoor space.

EXTERIOR PERSPECTIVE

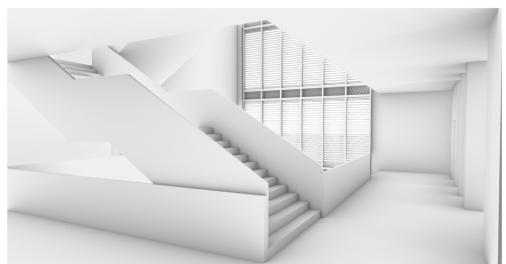

The building houses Tulane's four library archives on a site at the periphery of campus, adjacent to the massive Howard-Tilton Memorial Library.
